POOL PAINTS

“Good for a Quick Fix — Not a Forever Surface”

Pool paints come in four major types. Each offers a different balance of cost, durability, and ease of application.

Chlorinated Rubber Paint

“Cheap and Cheerful, But Short Lived”

Pros

- Very affordable
- DIY-friendly
- Dries fast

Cons

- Short lifespan: **2–4 years**
- Fades and chalks quickly
- Not suitable for long-term value
- Needs re-application regularly

Ideal For

Temporary fixes or properties being sold soon.

Epoxy Paint

“The Strongest of the Paint Family”

Pros

- Hard-wearing, chemical resistant
- Smooth and shiny
- Lasts **5–7 years**
- Good mid-range renovation option

Cons

- Prep work is heavy and unforgiving
- Must apply in dry conditions
- Slippery on steps without grip additives

Ideal For

Older concrete pools where a short-term to mid-term upgrade is needed.

Acrylic Paint

“Quick, Cheap, and Not for Long Life”

Pros

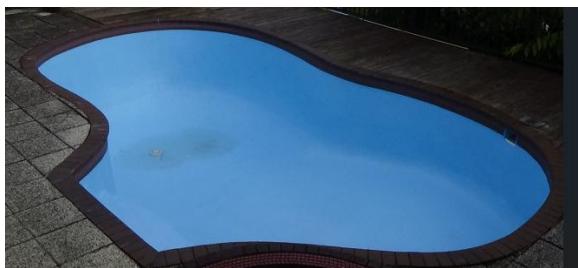

- Fast recoat times
- Easy application

Cons

- Very short lifespan: **1–3 years**
- Requires frequent reapplication

Ideal For

Commercial pools needing quick turnarounds or very low budget properties.

Fluoropolymer Paint

“Modern High-Tech Coating With Extra Bite”

Pros

- Great chemical and UV resistance
- Longer-lasting than other paint systems
- Attractive surface sheen

Cons

- Higher cost
- Requires correct prep and training

Ideal For

Owners wanting a better paint option without jumping to epoxy or fibreglass.
