TILES

“The Premium, Resort-Style Finish That Lasts a Lifetime”

What Are Tiled Pool Interiors?

Tiled pools use ceramic, porcelain or glass tiles fixed over a rendered concrete shell. They're widely considered the **top-tier pool surface** in Australia for aesthetics and longevity.

Appearance & Features

- Most luxurious finish available
- Infinite colour and pattern choice
- Water takes on a crystal-clear or deep jewel-toned appearance
- Smooth, durable and UV resistant

Pros

- **Longest lifespan of all surfaces: 30–50+ years**
- Tiles stay colourfast and resist fading
- Most durable, hard-wearing finish
- Individual tiles can be repaired when needed
- Very hygienic and easy to clean

Cons

- Most expensive option
- Installation requires highly experienced tilers
- Occasional tile or grout failure if substrate moves
- Longer installation time
-

Chemical Sensitivity

Tiles themselves resist chemical damage well; grout, however, still requires balanced water to avoid weakening or discolouration.

Repair, Upgrade or Replace

- Replace individual tiles
- Re-grout sections or entire pool
- Full retile for a complete premium renovation

Ideal For

High-end builds, luxury backyards, and anyone wanting a stunning, long-term interior without compromise.
