### VINYL LINERS

***"The Budget-Friendly, Soft-Underfoot Option"***

#### What Are Vinyl Liners?

Vinyl liners are flexible PVC membranes fitted into a track around the pool's coping. They're common in renovations of older concrete or fibreglass pools.

#### Appearance & Features

- Smooth, soft feel
- Printed patterns available (tile bands, blue mosaics, etc.)
- Clean, bright water colour

#### Pros

- Lowest upfront cost for most renovations
- Quick installation
- Very smooth — gentle for kids
- Easy patch repairs for small tears
- Good short-term solution for structurally sound old pools

#### Cons

- Shorter lifespan: **7–12 years**
- Can tear from sharp objects or pets
- Patterns can fade over time
- Not suitable for pools with significant structural movement
- 

#### Chemical Sensitivity

High chlorine or unstabilised water can bleach the liner. pH swings can cause wrinkling.

#### Repair, Upgrade or Replace

- Patch small tears
- Replace entire liner when ageing
- Upgrade options: fibreglass lining or pebble/quartz

#### Ideal For

Budget-conscious owners wanting a quick, clean-looking renovation.
